

A Big Thank You to George!!!

Due to the recent abundance of rain activity there have been road and ditches that have washed out throughout the Town. The Town's Public Works Department has been working diligently grading roads, repairing potholes, keeping the grass cut in our parks and right-of-ways areas allowing water to flow.

Recently, there have been some equipment breakdowns, which prevents Public Works from continuing their activities to maintain Town roads and ditches for proper water flow. Besides the seasonal drainage issues we have throughout the Town, we are working on a master plan to deal with the historic drainage problems and asking State & Federal Agencies for financial assistance.

A longtime resident, George, got permission from the Town to volunteer his own equipment and labor to repair the ditch on the corner of Eva Lane & Malabar Road. He stabilized the ditch with the sod he purchased himself.

This resident took the initiative and stepped in to assist the Town he loves and lives in to make it a better place.

A Big Thank you to George!
